

Document Preparation Service

LenderLive's Document Preparation Service is offered through our Guardian Mortgage Documents Division -- a leading, respected provider of document preparation services and software since 1987. Our unrivaled technology platform provides reliable, robust security to our clients, and ensures compliant document delivery on every transaction.

Multiple Data Input Options

Data integration options are available to reduce the time needed to generate documents. Guardian Mortgage Documents' web-based portal is available for manual entry of loan closing data or import of standard MISMO files. Additionally, partial and seamless data interfaces are supported to most loan origination systems, or LenderLive's development team will work with you to build a company-specific interface using a simple XML structure, or based on MISMO standards.

State-of-the-art Forms Engine

Our dynamic document engine allows for easy form customization upon request, providing maximum flexibility in tailoring document packages to your needs.

Compliance Guaranty

You can further rely on us for compliance support and monitoring of federal and state specific forms and uniform instruments, all of which can be backed by a straightforward compliance warranty.

Secure Document Delivery

Documents in PDF or PCL format can be returned through web-based delivery, password-protected e-mail, or system-to-system methods like web services. Multiple copies can be sent simultaneously or select pages, as needed.

An experienced account management team is always available to provide you a direct channel for requests and updates, ensuring all deadlines will be met.

Flexible, customizable document preparation solutions, backed by more than 20 years experience.

Experience, Innovation, Vision
