

eOriginator is LenderLive's proprietary, robust software that powers the loan agents' point of sale, assisting with the conversion of leads into applications. Among the many features available, agents can obtain automated pricing and accurate closing costs estimates, access credit report information, manage communication and compliance requirements, and obtain automated underwriting decisions.

eOriginator also serves as an information portal into your loan pipeline. Our paperless web environment streamlines the management of all loan files, providing you real-time access to view and manage electronic loan files. eOriginator also tracks every aspect of a loan from application to closing.

LenderLive's technology supports multiple levels of access, making eOriginator an ideal management tool for many people within one company, from corporate to regional to branch or individuals.

A turn-key, private-labeled point-of-sale web portal for loan officers, brokers and other types of loan origination agents.

Experience, Innovation, Vision
